

PLASTIC INJECTION MOLDING

WE OFFER THE BEST PRICES & GREAT SERVICE!

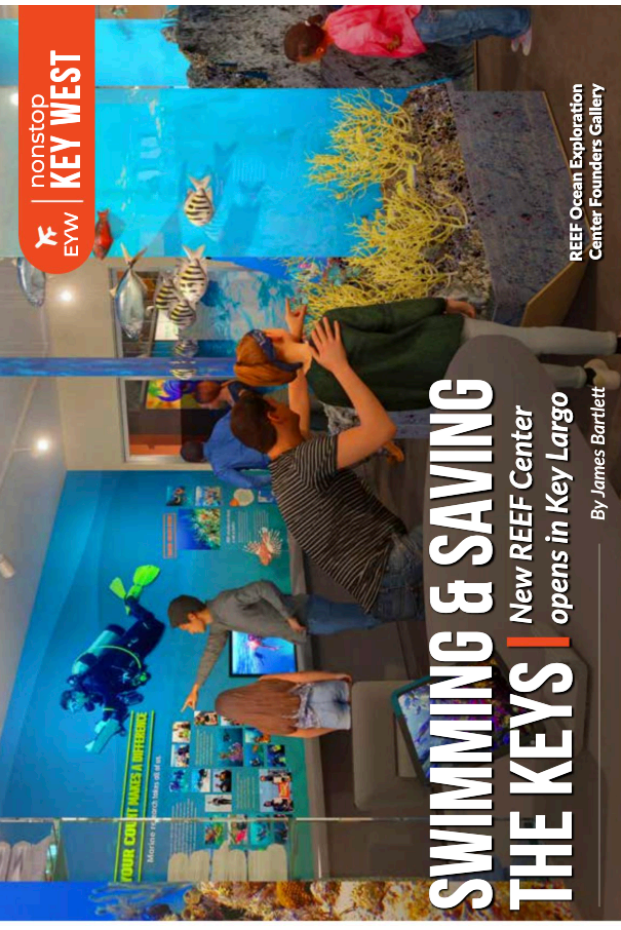

NTM IS SEEKING NEW PROJECTS!
We are willing to amortize tooling overproduction runs, and offering no charge for tooling on high production runs.

- Modern CAD CAM
- 15 Ton to 2,000 ton
- Mold flow analysis
- Prototype/ Models within 2 weeks
- Full engineering and QC staff
- No job too small
- Welcome existing jobs to quote
- Hot stamping
- Sonic welding
- Complete assembly

SWIMMING & SAVING THE KEYS

New REEF Center opens in Key Largo

By James Bartlett

REEF Ocean Exploration Center Founders Gallery

Summer is prime time for snorkeling, diving, swimming and boating the waters of the Florida Keys. Out on the water, there is a good chance you will see marvelous creatures like turtles, dolphins or any number of colorful fish. The new REEF Ocean Exploration Center jumps into this underwater world, offering the chance to get involved as a future ocean steward.

The REEF Ocean Exploration Center opens in Key Largo on June 7 and 8, and across its two floors, galleries, classrooms and exhibits cover the history, science and conservation of life below the waves. It also looks at the dangers coming from the deep blue, too, including the impressive-looking but invasive lionfish.

"We want the ocean to come to life for everyone here," says Christy Pattengill-Semmens, PhD, REEF Co-Executive Director. Semmens suggests taking on the Century Dive challenge to spot 100 or more fish species that are on display, or becoming a marine detective and tracking invasive lionfish. The activities at REEF promise a fun, free, hands-on adventure for all.

Live coral can be found surrounding the Florida Keys

REEF Headquarters - one of the oldest cove houses

REEF (Reef Environmental Education Foundation) is based in the oldest original building still located in the Upper Florida Keys, and it has an outdoor oasis and Native Plants and Heritage Trail. It fights to conserve marine environments everywhere, and their programs include educational experiences about fish identification and citizen science, especially regarding the lionfish, a very hungry species that has been causing havoc along the coast.

The April Lionfish Derby competition challenges local fishers to catch as many as they can, and many local restaurants have added them to their menu. Give them a try if you get the chance! reef.org
